

Transportation Commission Meeting Minutes

March 20th, 2019

Present: T. Filorimo, C. Dineen, H. Burgess, J. Belkin, N. Palumbo, T.J. Schiavoni, T. Neely, M. Lieberman,

The meeting was called to order at 3:00PM. The February minutes were approved as presented.

Chairman Filorimo advised that C. Shields could not attend today's meeting. Chairman Filorimo also advised he would not be able to attend the scheduled 4/17 meeting; consideration will be given to moving this meeting date.

The South Fork Commuter Connection service began operation on March 4th. The members were advised of the initial ridership results and operational matters related to the start of service. Initial ridership is light, as was expected due to the early season start of service. The shuttle services are operating with no issues. Ridership figures will be provided weekly by the shuttle companies; monthly reports will be provided by the LIRR on the purchase of SFCC tickets. This will provide the basis for the LIRR \$1 pp rebate and the STOA funding submissions. For logistical reasons, the LIRR will be limited in its ability to provide daily SFCC passenger counts. Trip passenger count audits will occasionally be conducted.

M. Lieberman and N. Palumbo provided information on the County 'Hike & Bike' informational meeting and website. Information on the activities of the ad hoc Town biking advisory committee was also provided. Members were encouraged to provide input and support for biking efforts through the County program and Town ad hoc committee. The Town has not yet received any notification from the State with regard to the TAP grant application submitted.

Discussion of the status of the unimproved roads program was postponed.

The members were advised that the Bridgehampton Traffic Safety project is moving forward, with some work to possibly be done this spring; and most to be schedule for fall 2019.

A draft of the Commissions' Annual Report to the Town Board was distributed; an electronic copy will be sent to the members for further review and comment.

The next Commission meeting has been rescheduled and will be held on April 24th, 2019 from 3-5PM in the Lower Level Meeting Room.
