PWC/Jet Ski & Float	200	3/8"	1/2"
PWC/Jet Ski	150	3/8"	1/2"

1. All shackles and pins with stainless steel wire.
2. The effective length of each of the above pennant lines shall be two (2) times the distance from the bow chock to the water plus the distance from the bow chock to the mooring cleat, or shall be two (2) times the distance from the stem mooring ring to the water. All pennants shall be six (6) feet in length.
3. All anchor shackles, swivels and other hardware used in mooring hookups shall be of proportionate size to the chains used. A minimum of one (1) swivel shall be located between the bottom chain and top chain. Chains of one size throughout shall have a minimum of one (1) swivel located below the main buoy not more than halfway to the mushroom anchor. All chain and hardware must be of appropriate rated strength.
4. The length of the top chain shall be determined by the depth of the water in the assigned mooring area and the total scope shall be at least 40' or two and one-half (2-1/2) times the depth of the water at high tide as determined from local charts, whichever is greater.
5. All pennant lines shall be nylon, dacron, chain or stainless steel wire. All pennant lines running through a chock or any other object where chafing may occur shall have adequate chafe guards.
6. Moorings may be required to be installed under the supervision of the Trustees or their duly authorized agent and they may direct the placement of said mooring in the correct location.
